## DO-IT-YOURSELF AND SAVE!

# EASY INSTALLATION

### INSTALL USING SIMPLE TOOLS!

**Fasten the Hardware**

**Stack the Door**

**Set the Spring**

### EZ-SET® TORSION SPRINGS

### ALL THE BENEFITS OF STANDARD TORSION, PLUS...

#### FASTER

- Adjust spring tension in seconds with a power drill

#### SAFER

- Eliminates the need to lift the dead weight of the unsprung door
- No dangerous manual winding process

#### EASIER

- User-friendly 45° angle allows spring adjustment without a ladder
- Galvanized springs are clean, durable and last 50% longer

## NEED HELP WITH YOUR PROJECT?

## HIRE A LOCAL PRO FROM MENARDS INSTALLER CENTER

**Purchase the garage door** for your project.

**Visit the Installer Center** at your local Menards and review the pro's information.

**Do your research** on the pros.

**Interview and hire** the pro of your choice.

# RESIDENTIAL

## TRACK OPTIONS

Determine the right track option for your new residential garage door from the options below.

### STANDARD RADIUS

### LOW HEADROOM FRONT MOUNT

### HIGH LIFT

### LOW HEADROOM REAR MOUNT

Headroom = Top of door to nearest obstruction (truss, ceiling or light fixture).  
 Up to 3" of additional headroom may be required for a trolley door opener.

See back cover for information on how to measure for your new door.

## GARAGE DOORS

AMERICAN MADE FOR OVER 50 YEARS

CEILING

HEADROOM

HEIGHT

WIDTH

FLOOR

### MEASURING FOR YOUR NEW DOOR

Measure existing door **width** and **height** in feet and inches. This determines the size of door needed. The rough opening should be the same size as the door.

Measure **headroom** as the distance between the top of the door and the ceiling or first obstruction.

# Design & Buy™

### CUSTOMIZE YOUR GARAGE DOOR!

Choose your door style, width, height, color, windows, track, hardware and MORE!
